P 8 Product Stability

P.8.2 Post-approval stability protocol and stability commitment

The studies on exhibit batches are up to 6 months at 40° C/75% RH and 36 months at 30° C/75% RH. The study protocol is provided in Table 1.

Table 1: Stability Protocol with exhibit batches of Solifenacin Succinate Tablets BP 5 mg. ALU/ALU blister pack of 10 tablets, Such 10 blisters is packed into a carton along with pack insert

√ = Testing done; X = Testing not required.

The following test parameters are monitored during the stability study:

1. Description
2. Dissolution
3. Disintegration Time
4. Hardness
5. Assay
6. Related Substances By HPLC
7. Microbial Limit Test*

* Test will be done initially and after 6 months of 40°C/75% RH condition and annually upto 36 months of 30°C/75% RH storage condition.
